Hwanhee Cho

Senior Researcher, Korea Railroad Research Institute (KRRI)

hcho88@krri.re.kr · ORCID 0000-0002-4966-0099 · https://wheee88.github.io · https://github.com/wheee88
Generated 2026-10-12 — first-author papers highlighted

Senior researcher in the Electric Railway Power Research Division at the Korea Railroad Research Institute (KRRI). Research focuses on power system stability and oscillation analysis, and on electric railway power supply systems including energy-saving operation, hybrid energy storage, and MVDC.

Education

- B.S. in Electrical and Electronic Engineering, Dankook University, Yongin, South Korea (2007 – 2014)
- Integrated M.S. and Ph.D. in Electrical and Electronic Engineering, Korea University, Seoul, South Korea (2014 – 2020)

Experience

- Secondment to the Korea Agency for Infrastructure Technology Advancement (KAIA), Anyang-si, South Korea (Feb. 23, 2026 – Feb. 22, 2027)
- Senior Researcher, Electric Railway Power Research Division, Korea Railroad Research Institute (KRRI), Uiwang-si, South Korea (since 2020)

Research Interests

- Power Systems: Power System Oscillations, PMU, Power System Stability
- Electric Railway Systems: Energy Saving, Hybrid ESS, MVDC, AC/DC Hybrid, Railway Computation

Skills

- Engineering tools: PSSE, PSCAD, MATLAB, Simulink, OPAL-RT (eFPGASim, eMEGASim)
- Programming: C, Python
